# BOOK WEEK

Early Years enjoyed their Pyjama Day during book week...

# Juniors joined Early Years to read together....

...then the Seniors helped out.

Early Years  
and Juniors  
then  
dressed up  
as their  
favourite  
book  
characters...

**Then, the Juniors stumbled across a mystery egg in the forest! Mr Mwanzia designed this hoax to help inspire some very creative writing...**

# Book Week: Celebrating the Joy of Reading

This year's Book Week was a whirlwind of literary fun! We kicked off with Genre Exploration, diving into the diverse world of books. The Drop Everything and Read session brought the school together in silent reading, while our seniors shared stories with Reading for Junior School Students. The Library Treasure Hunt added excitement as students raced to solve clues. It was an exciting challenge that tested students' knowledge of books and their ability to navigate the library, making research fun and engaging. The week ended with Dress Like a Book Character Day, where students brought their favorite literary figures to life.

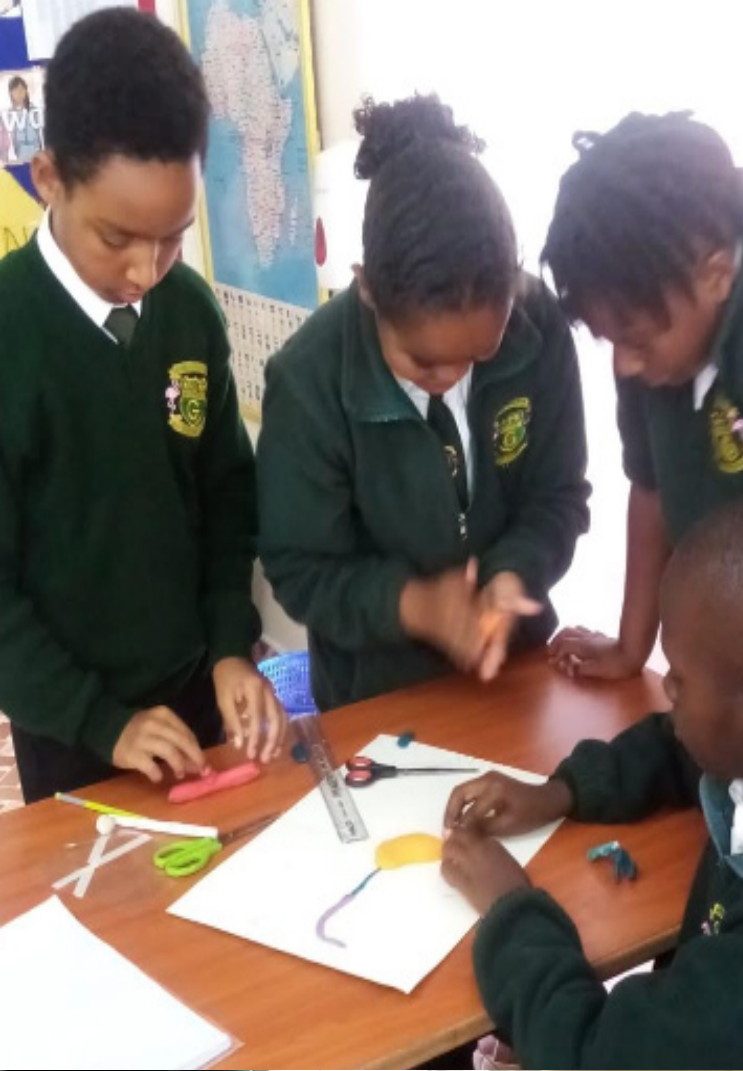

**Year 5 pupils did a great job modelling the human digestive system this week...**

# Year 10 & 11 Work Experience Week

## **Adrian – Aqua Sanaki (Farming)**

"I carried live fish from the pond to the weighing center, cleaned and gutted them, and even herded fish in the water.

Delivering fish to clients was an interesting experience. I learned how to herd fish by receiving instructions while in the pond. I was efficient at carrying fish and herding them, but I need to improve my gutting skills to work faster."

## **Favour – Franck Mwangi & Co (Law Firm)**

"I conducted research on invalid charge contracts and learned how to register cases in the small claims court. I also visited a courtroom and observed real proceedings, which gave me a better understanding of legal practice. My research skills improved, and I gained confidence in asking questions. I felt very engaged and productive today!"

## **Gregory – Legal Work Experience**

"I worked on writing a sample PLAINT for a case regarding unlawful child custody. I learned how to structure a plaintiff, addressing the right court branch and describing both the Plaintiff and Defendant. My work was described as above average for a beginner, which was motivating. I'm improving, but I need to refine my legal writing further."

## **Cariappa – Isuzu (Automotive Maintenance)**

"I replaced a spring damper, changed brake pads, and learned to use a grease gun. The toughest part was dealing with stiff bolts. I also got introduced to copper welding. I did well with hands-on tasks, but handling heavy tools was challenging. I need to build more strength and refine my technique for greater efficiency."

## **Nahla – Dentistry Observation**

"I observed a dentist performing extractions, fillings, and polishing infected teeth. Watching the procedures made me appreciate the importance of oral hygiene. It was hard to keep a straight face during extractions because I was nervous, but I gained valuable knowledge on dental care and patient interactions."

## **Kamraan – Rift Valley Engineering**

"I assisted workers and learned to operate different machines. Understanding the importance of precision in engineering was eye-opening. I picked up new skills quickly, though some machines were difficult to grasp initially. It was a great learning experience!"

## **Michelle M – ABC Bank**

"I learned about banking systems, how to process cheques, and document scanning. I also interacted with customers, which was a great experience. I enjoyed the fast-paced environment and had a smooth and productive day with no complaints!"

## **Lavine – MG Innovation Hub**

"We researched different software that had a major impact on revenue and the problems they solved.

We also discussed coding languages and their applications. Since today was mostly discussions, we didn't do much hands-on work, but it was insightful."

## **Jabril Davis – MG Innovation Hub**

"I researched influential software programs, specifically Windows, and presented my findings. We also answered questions on software engineering and its applications. The work was easy, but I can improve the depth and length of my responses in the future."

## **Sanoli (Menengai Oil Refineries)**

"I learned about the processing of oil from raw material to finished product. I was given an introduction to the different steps of refining and packaging. My strength is that I was keen on understanding the processes. Since it was my first day, I have not yet identified a specific weakness."

# House Patrons

# Meet the Teacher

This week, we learn a little more about Ms Beth Uside, Teaching Assistant....

## **What inspired you to enter the teaching profession?**

I developed my love for teaching from the love I received from my grade four class teacher. She showed me compassion, care and empathy making her my role model. Additionally, I have grown up considering teaching as the only profession which can change the world; the profession which can change lives and societies.

## **Where did you grow up?**

Partially in western Kenya and partially in Nairobi.

## **If you could do any other job, what would it be?**

A journalist. I love staying informed and sharing ideas.

## **How would you spend Your Ideal Weekend?**

An ideal weekend would involve spending time with my loved ones, exploring nature through picnics and perhaps some self-care.

## **What is your favourite song?**

“Remember when” by Alan Jackson

## **Tell us something that we do not know about you:**

Cooking is my passion especially chapati. I enjoy preparing meals for my family.

## **What was the last book you read?**

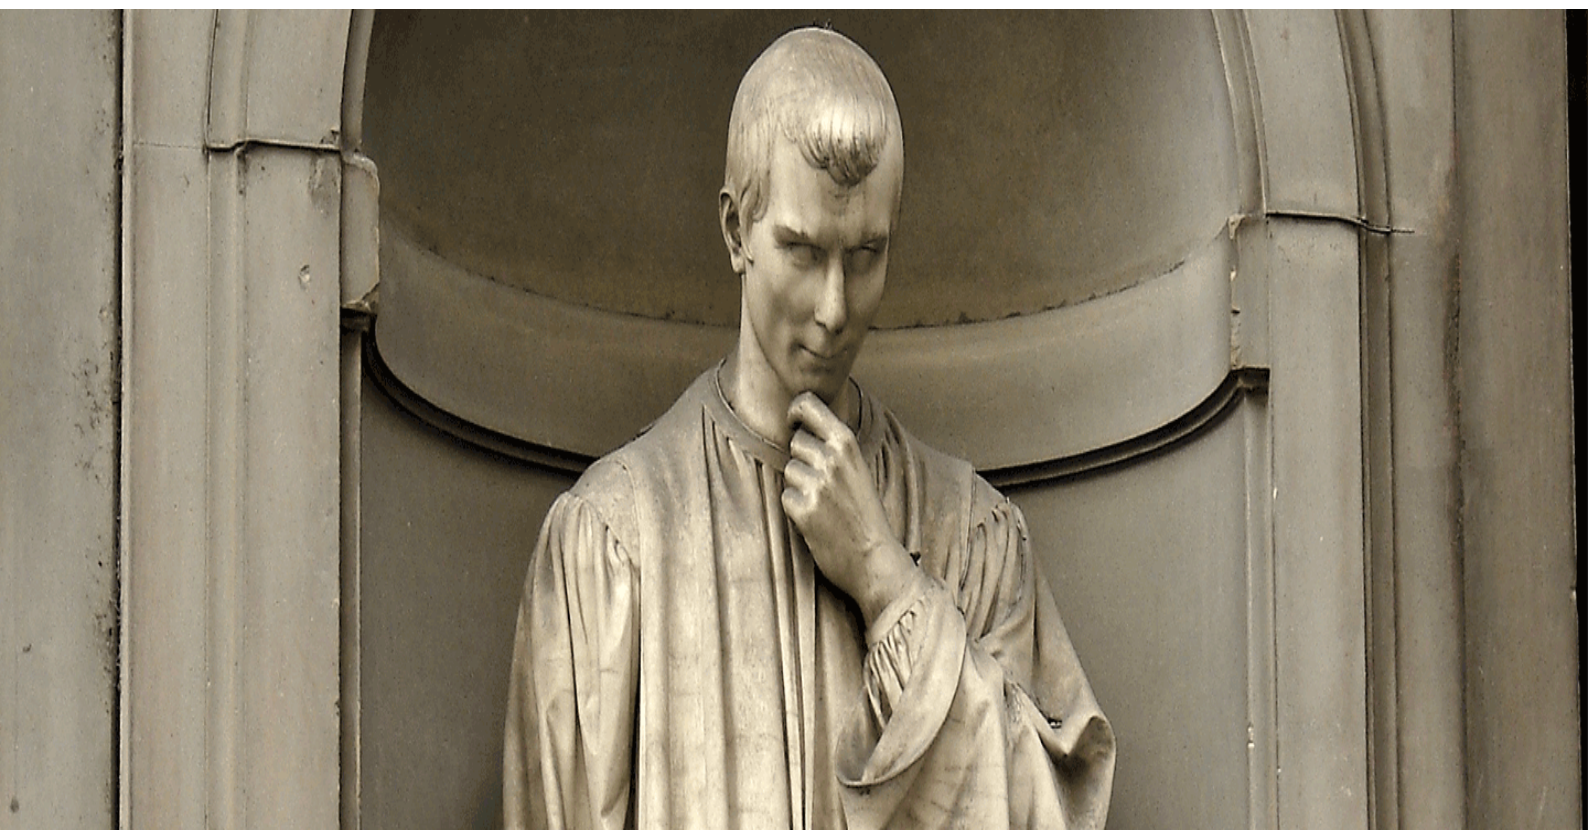

“Great expectations” by Charles Dickens.

## **What is your Favorite meal?**

I love chicken pilau served with tomato salad.

## **If you could invite anyone (throughout history) to join you for dinner who would it be?**

I would invite Niccolo Machiavelli.

# **KENYA**

## **2024 Awards Ceremony**

**Well done to our former Year  
13 students (class of 2024)  
for the following  
outstanding Pearson  
BTEC performance...**
